

Corey M Kirkwood

Military Veteran | Leader | Data Scientist

Manhattan, KS | coreymkirkwood@gmail.com | github.com/kirkwodoster

Summary

Accomplished Data Scientist and Aviation Officer with over 10 years of experience leading high-stakes operations and complex analytical projects. Proven track record of bridging the gap between operational strategy and technical data solutions.

Professional Experience

US Army - Aviation Officer

2020 - Present

AH-64E Apache Pilot

- Served as a strategic advisor to senior leadership, conducting data-driven risk assessments and presenting operational viability reports to guide high-stakes decision-making for mission accomplishment and success.
- Directed strategic preparation for 50+ mission-critical projects, managing cross-functional logistics and resource distribution to guarantee success in dynamic environments.
- Directed training and professional development for a team of 20+ personnel, overseeing performance reviews, workflow optimization, and technical instruction in operations and logistics
- Achieved a 100% score on an external regulatory audit (Aviation Resource Management Survey) by re-engineering workflows for a \$1M+ program, establishing a sustainable compliance framework that ensured long-term operational readiness.

Naval Air Systems Command (NAVAIR)

2019 - 2020

Operations Research Analyst - Cost Analyst

- Effectively engage and communicate cost models and budget projections to high-ranking military and civilian personnel, resulting in cost reduction on numerous multi-million acquisitions.
- Construct story-driven presentations with captivating data visualizations to senior civilian and military leadership to convey cost modeling strategies and analysis.
- Served as Technical Lead for data visualization, leveraging Python libraries (Matplotlib, Plotly, Seaborn) to engineer complex, multi-dimensional dashboards that enabled key performance metrics.
- Acknowledged for utilizing the Python programming language for successfully mining defense-related information that resulted in reduced cost for future government acquisitions.

US Navy

2013 - 2019

Master-At-Arms (Military Police)

- Applied and led law enforcement and anti-terrorism tactics to ensure good order and safety of Naval facilities in Greece, Romania, and California.
- Led over 100+ Navy Sailors to numerous mission-related qualifications; thereby, achieving success and encouraging growth and development of personnel under my leadership.
- Recognized for creating an Excel program that greatly benefited my department by organizing, planning and tracking small-arms qualifications for over 120 personnel with 100% accountability.

Education Skills and Personal Projects

Education

- Penn State University** - *Graduate Certificate in Applied Statistics*
- Lewis University** - *MS Data Science*
- UC Irvine** - *Criminology, Law and Society*

Skills

- Programming Languages** - Python, SQL, R
- Python Packages** - TensorFlow, Pytorch, Scikit-Learn
- Machine Learning** - Data Modeling, Deep Learning
- Data Visualization** - Tableau, Matplotlib, Plotly
- Cloud** - AWS, Google Cloud, Azure

Personal Projects

Algorithmic Weather Trading Bot

- Developed a Python-based ETL pipeline that web scrapes raw National Weather Service data for an advanced regression model.
- Automated trades by utilizing the Kalshi.com API to make profitable and accurate weather predictions.

Crypto Statistical Arbitrage Dashboard

- Built a data-intensive dashboard to facilitate decision-making for statistical arbitrage in cryptocurrency pairs
- Leveraged the Binance API to ingest market data and apply quantitative methods for automated, profitable trade execution.
